09:30	10:00	Intermission - Trade Show	
10:00	11:00	Aircraft Battery Airworthiness BOB BURKEL	PPG Sealants SUZANNE LEAVENS
11:00	12:00	Dangerous Goods KEVIN ANSON	Component Reliability pt. II MAZE HOBEYN
12:00	13:00	Lunch - Trade Show	
13:00	14:00	Licensing and Bilateral Airworthiness Agreements JARED DOELL	
14:00	14:15	Closing Ceremonies	

Course Title	Course Description
Aviation & Cannabis	<p>With the legalization of recreational cannabis in Canada arrived in October 2018, we are in the early stages of seeing how to manage potentially more substance abuse issues in the workplace.</p> <p>Commonly, workplace policy and procedure development help prepare for this change. However, questions involving clinical treatment and health management arise once substance use actually shows up in your workplace.</p> <p>With a focus on aviation employees, this presentation will highlight details of the presence and impairment issues associated with cannabis (compared with alcohol). We'll also discuss how to manage these situations – before they happen, and what to do when presence/impairment shows up at work.</p>
Bell 505JRX Technical & Product Update	This presentation will feature an introduction on the 505JRX, as well as updates and new kits available.
Certification 101 for Buyers	This presentation will focus on deciphering AC571-024 and determining what type of certification is applicable to the part. Focus will be on what is required on both an Authorized Release Certificate (as per CAR 571 Appendix J) and what is required on a Certificate of Conformance with examples to discuss/review. This presentation will hopefully provide some tips for those new to Purchasing and give some guidance on why paperwork is so important.
Digital Services & PT6A Engine Rigging	The presentation will show the new Digital Services provided to customer by P&WC via the “MY PWC Portal” and Public Website to assist with technical and commercial support. As an example, a newly released digital tool for PT6A engine rigging will be demonstrated.
Transportation Safety Board	This presentation will provide an address who the TSB is and provide an overview of the investigation process. The session will also include what an AME/AMO can anticipate from the Transportation Safety Board during an investigation.
Airworthiness Directives & SDR's	This session will provide an overview of Service Difficulty reporting (SDR) and its respective CAR 521 regulations. It will also show how SDRs they are processed and forwarded to OEMs for follow up action.
Textron Aviation Products Update	A presentation on Textron Aviation products and aircraft produced including King Airs, Caravans, piston products and jets. Presentation will also include a troubleshooting review.
Insurance for Aircraft Maintenance Engineers	Aviation Insurance can be more interesting than you think. You will learn about all types of risk, making sure you are covered, avoiding pitfalls, covering your customers, aviation and non-aviation policies, and gaps and overlaps. Included will be how the aviation industry's higher duty of care extends to insurance, what to do if a claim occurs and lots of meaningful real claims examples. Can you afford not to purchase insurance? Highlights of Sound Insurance's three programs for AMEs will be presented.
SAFRAN Helicopter Technical Update	The SAFRAN Helicopter Engine Technical Update will highlight the on-going improvements on the Arriel and Arrius Engines. Customer irritants, maintenance improvements and new services are also presented.
Aircraft Battery Airworthiness	The battery is the heart of the aircraft. Concorde presents the varied battery technologies in the marketplace, safety, lead acid aircraft battery ratings, commissioning of lead acid aircraft batteries, and the maintenance process. Including the best practices of servicing: capacity testing, charging, and maximizing the life of your battery. Also, cleaning & storage, installation eligibility.
PPG Sealants	Session to cover overview of PPG and products offered. It will also cover where the sealants are applied and how to mix a semkit by hand properly and if the product is under / over mixed.
